This is an e-commerce based platform where people can buy and sell items. The functionalities of the platform are explained below:

1. Account Creation: To get started, simply sign up for an account. We'll collect some basic information from you, including your name, email address, and a secure password. Once registered, you're all set to explore and use our platform.

2. Item Search: You can begin your shopping journey by searching for items you're interested in. We provide a simple search bar where you can enter keywords or browse through categories to find what you need.

3. Create a Post to Sell: If you have items you want to sell, it's easy to create a post. You'll need to provide the following details for your item:

- Category: Choose a category that best fits your item, such as clothing, electronics, or home decor.
- Title: Create a catchy title to attract potential buyers.
- Description: Write a clear and concise description of the item, including its condition, size, or any other relevant information.
- Price: Set the price for your item.
- Quantity: Specify how many of the same items you have available.

4. Edit Your Posts: We understand that details may change over time. You can edit your posted items at any point to update their category, title, description, price, or quantity.

5. Shopping Cart: As you browse items, you can add them to your shopping cart. This feature allows you to keep track of items you want to purchase. When you're ready to check out, simply review your cart and proceed with the payment process.

6. Profile Editing: Your profile is your digital identity on our platform. You can access your profile to make changes to your personal information, such as your display name or profile picture.

7. Account Security: We take user safety seriously. Accounts engaging in malicious activities or using inappropriate language may be subject to deletion by admins.

8. General Security: Users can not edit / delete posts of someone else. Admins can not see users' private information. When creating the post, each property is validated.
